**Did you know?**

## Full line of wireless emission test equipment/stations from Assemblad

Infragas - 205

All **Assemblad** gas analysers, smoke meters and RPM meters are available as wireless equipment. The wireless set-up is achieved by means of optional Bluetooth connections and built-in batteries. A versatile architecture allows to combine all equipment in a variety of configurations to suit all possible needs

for motor vehicle testing and statutory periodical technical inspections. Equipment provided with on-board display, keypad and printer like the **INFRAGAS 205** and **305**, the **OPA 105.LCD** and the **RPM 111** can be used as stand-alone testing devices, with which additional black-box modules like the **INFRAGAS 109** and **209** and the **OPA 105** and **105.PCB** can be connected to make up a full emission test set.

Moreover, all black-box modules can be combined in a pc-based test station capable to be connected to a pc that runs the

**Assemblad** emission test software or the **SUITE WREV** Test Line Management Software.

Opa - 105.PCB

2019 is the year of one of the most important trade shows worldwide, **AUTOPROMOTEC**, which will take place in Bologna, Italy, **May 22<sup>nd</sup> to 26<sup>th</sup>**

We are glad to invite you to visit us at our stand

**Hall 30 stand D 42**
