## New Particulate Meter from Assemblad on display at the Autopromotec 2019 show

Further to studies carried out in several European countries and in conformance to the EU guidelines for improved technical inspections, new particulate emission tests are on their way to be introduced in Europe. Countries like Switzerland, The Netherlands, Germany, Belgium and the UK have already planned or announced the introduction of PN test from 2020 onwards; more countries in and outside the EU are also expected to follow suit as nanoparticles represent today a major concern for environmental protection against pollution generated by both petrol and Diesel engines.

**Assemblad**, which has been designing and manufacturing own emission testers for the automotive aftermarket since the late 80's, presents its new Particulate Meter at the Autopromotec 2019 exhibition.

The new **Assemblad Particulate Meter** is based on a new technology to perform particulate measurement in compliance with the draft specifications developed with contribution of major technical institutions (the Dutch TNO, the German Bast and more) which have been submitted to the OIML to become an international standard.

2019 is the year of one of the most important trade shows worldwide, **AUTOPROMOTEC**, which will take place in Bologna, Italy, May 22<sup>nd</sup> to 26<sup>th</sup>
