News Bulletin

automechanika FRANKFURT

The 25th edition of Automechanika Frankfurt, the most important industry event worldwide in 2018, closed down September 15th scoring 136,000 trade visitors from 181 countries, coming to see over 5,000 exhibitors from around the world.

“The vast majority of visitors came to Frankfurt well prepared, and our members enjoyed good professional talks with them. One thing that was particularly notable was the number of decision-makers here, something that applies to visitors from Germany, as well as from abroad.” Frank Beaujean, President of ASA Germany declared.

The **Assemblad** team at the show also enjoyed a rewarding number of meetings with professional traders from many countries, showing a remarkable interest for the **Assemblad** Products.

Did you know?

As well as for the emission analysers (**INFRA GAS** exhaust gas analyser and **OPA** Diesel smoke meter) which are based on the proprietary measurement benches **INFRA QUEEN** and **OPA KING**,

also the **RPM-111 Universal multi-mode engine rpm meter** is designed using proprietary technology. The RPM-111 is capable to pick-up engine speed and temperature from all kind of existing and foreseeable motor vehicles no matter what the kind of power unit is.

Coming to brake and suspension testers, those products are also fully designed and manufactured in the group facilities at component level and quality insurance process covers every bits and pieces.

This represent a guarantee for the customers in terms of reliability, upgradability and serviceability of the **Assemblad** products. Our business partners can therefore make advantage of effective technical support, training and off-the-shelf available spare parts.
