## Solutions for Commercial Vehicles Testing

### From Assemblad

Commercial vehicles, both light and heavy duty, in many cases require suitable accessories if not purpose-designed equipment or parts, for shops to offer their services to trucking industry.

Smoke meters, for example, need shaped tail pipe probes or adapters for exhaust stacks as well as a bench cleaning system suitable for heavy duty use. Battery-operated and wireless equipment are also preferred for use in large yards.

Portable or mobile sets are in many cases also preferred particularly for fleets that want to run tests or inspections in the local subsidiary using fully-equipped vans or trucks, without wasting time and money by making trucks move to the test centre. In such cases, mobile truck plate brake testers are the perfect choice to equip a mobile test station: the truck plate brake tester can be quickly and easily unloaded and installed almost everywhere.

**Assemblad** has developed a number of truck-oriented solutions that shop professionals appreciate to make their job comfortably and professionally so to increase the productivity of the shop.

#### **SUMMER HOLIDAY CLOSURE:**
