News Bulletin

Did you know?

The **Assemblad** emission testers, both for petrol and for Diesel engines, are designed and equipped to perform the test on any kind, size and fuel-type vehicle.

The gas analyzers, as an example, are fit for testing also all kind of 2- and 3-wheelers, from the small buzzy 2-stroke moped up to the big rumbling highway motorbike. And that's achieved by means of a set of accessories the user may choose to adapt the tester to the use.

In the case of Diesel engines, the **capability of testing any kind of vehicles all the way up to large freighters** is of paramount importance for the repair shop, particularly when it comes to fleet maintenance.

One of the key issues to properly test Diesel opacity (or smoke) is to sample the right amount of exhaust gas out of any tailpipe of the many different kinds. **Assemblad** provides for a **set of sampling probe adapters** to do the job and make it possible for **any shop to test opacity on any possible Diesel vehicle** existing in the marketplace.

2020 is the year of one of the most important trade shows in the world

AUTOMECHANIKA, in Frankfurt, Germany,
September 8th to 12th

We are glad to invite you to visit us at our stand
Hall 8 stand L61

*Due to the **CoVid-19 outbreak**, Assemblad has re-organised its working schedule to minimize risks of contagion for the staff. However, production capabilities are ensured to fulfil existing and foreseeable orders.*

The whole Assemblad staff want to express their deep appreciation for those who fight CoVid-19: doctors, nurses, civil protection staff. We all owe them our utmost thankfulness for their restless endeavour.
