The Assemblad Particulate Meter getting ready for the markets

The **Assemblad PRT-121** Particulate Meter is going to get the necessary approval by a notified test laboratory. As all other emission test equipment used for statutory tests in Europe, Particulate

Meters need to be tested for compliance with the standard referred to by the law, to be used in authorized PTI centres. There are several qualified test laboratories in Europe that are recognised by the regional PTI Authority; amongst them, the NMI in the Netherlands, chosen by **Assemblad**, is one of the most prestigious and is recognised by most competent Authorities worldwide. Tests

have already started and are expected to be completed by the year end. Then anyone who's looking to procure a quality particulate meter will have the chance to buy it from **Assemblad** and enjoy the quality of the **Assemblad** products and services.

The New Assemblad Website

A new re-designed website is now on-line! The new website is designed for an improved customer experience and a faster access to the information sought after, including specific product and service information and features.

Our Partners are welcome to visit us on our new website at www.assemblad.com
