NEW PRICE LIST TO BE RELEASED

In this period of economical volatility and quick price variations, we in **Assemblad** always do our best to support our partners, by maintaining our price list as long as possible, to let them to do their business with as much stability as possible.

For this reason, we announce that the 2022-2 **Assemblad** Price List will be released in July, with validity from August 1, 2022, with moderate price increases, but not only that!

The new **PRT-121** surely stands out as our newest addition to our range, a particle counter to test the newest vehicles with DPF filters, a key component that so far could be damaged, broken, or even worse illegally removed from the vehicle, as there was no system to verify it. Now with the PRT-121 is finally possible to check if the DPF filter is working.

Talking about brake testers, our **Plate Brake Tester for commercial vehicles** is now available in several versions, from the shortest 2-plate version to the longest, 18 plates!

Basically, it has become a modular instrument to check the breaking system of any commercial vehicle in a fast, reliable, and environment-friendly way, as its energy consumption is less than a thousandth of the consumption of a traditional roller brake tester.

We will be in Frankfurt, Germany, **September 13th to 17th**, at

automechanika

FRANKFURT

We are glad to invite you to visit us at our stand

Hall 8.0 stand D 10
